

## Batteries

No matter which model you use, the Ultra Lithium Battery provides constant power and an operating range display, which indicates the remaining power level in real time: This gives you between half a day and a full day of work depending on the type of tool used.

The Ultra Lithium Battery is equipped with an “intelligent” charging system. The battery can be charged at any time. In addition, if not used for 4 consecutive days, the batteries discharge automatically for optimum storage and an excellent service life. After at least 800 full charge and discharge cycles, the capacity of the battery is still 80% of its initial capacity, which does not reduce the power delivered by the battery.

Supplied with an ergonomic harness, which can be perfectly adjusted to your shape and size, PELLENC batteries have been designed to make your day to day tasks easier and to give you greater operating range and freedom in your work. The Ultra Lithium Battery also safeguards the environment as lithium-ion is 80% recyclable.

	200	400	700	800	Poly 5
Total weight	2.4 kg	4 kg	6.1 kg	6.6 kg	3.6 kg
Voltage	50.2 V	50.2 V	50.2 V	50.2 V	50.2 V
Capacity	4.4 Ah	8.8 Ah	15.4 Ah	17.6 Ah	10.6 Ah
Stored energy	200 Wh	400 Wh	700 Wh	800 Wh	500 Wh
Minimum lifetime	Minimum 800 cycles	Minimum 800 cycles	Minimum 800 cycles	Minimum 800 cycles	Minimum 1,200 cycles
